

MULTIVATOR

BLEC MULTIVATOR

- Close 10cm and / or 20cm blade spacing
- De-compacts, Recycles and Top Dresses
- Special carbide faced blades slit and lift soil
- Depth control via flat skid frame
- Drag brush incorporates soil into the surface
- Hook on rear attachment frame
- Optional blades for de-compacting only

The BLEC Multivator is a unique sportsturf renovation implement carrying out de-compacting and top dressing by recycling buried soil / root zone up to the surface and incorporating back into the root structure, saving time and money from importing materials. The specially designed blades lift the soil and leave any unwanted stones buried for a clean finish. A rear drag brush incorporates the soil dressing into the surface. The Multivator can also be used only as a rotary de-compactor by fitting the optional smooth blades – leaving a clean finish.

Model	180
Model Number	115.180.000
Tractor hp requirement	45-80
Working width cm	180 cm
Number of blades 20cm spacings	18
Number of blades 10cm spacings	36
Working depth cm	18 cm
