

TURFMAKER SEEDER

BLEC TURFMAKER SEEDER

- Well proven method of seeding
- Accurate seeding – adjustable 5-50gms/m²
- Stainless steel seed metering system
- Heavy duty 3 point linkage frame
- Spacer rings standard on all Turfmaker models to allow better germination of seeds
- Front rake tines to loosen soil

The BLEC Turfmaker Seeders are based on a proven method of seed incorporation. The front notched ring rollers crush lumps and level the soil to create a firm surface also producing small pockets in the soil, ready to accept the grass seed, which is spread the full width of the worked area (not drilled into lines). The rear set of rollers split the shallow ridges formed by the front rollers – incorporating the seeds evenly in the top 12mm soil, and surface disturbance is kept to a minimum.
